

A large, stylized black silhouette of a decorative streetlight pole and arm with a light fixture, positioned on the left side of the page. The background is a solid green color.

Decorative Streetlights LED BULB CONVERSION

WHEN

The project is planned to kick off **mid-April 2026** with an estimated completion in **August 2026**.

This is a system-wide project to upgrade approximately **1,200 lights**.

AREAS IMPACTED

This project will impact the entire system, specifically areas that have underground decorative lighting like **subdivisions** and **apartment complexes**. Areas of recent construction (past five years) already have LED lighting in place.

INSTALLATION TIMING

The upgrade process for each streetlight will take approximately **15 minutes**.

LED BENEFITS

This upgrade to the decorative streetlights will provide **more efficient** operation and **better lighting** for Easley residents - without additional fees for customers.
