

FIGHTING FOG CLOGS

THE FUNDAMENTALS OF FLUSHING

FIGHTING FOG CLOGS

Cooking fats, oils, and grease (**FOG**) coats pipes similar to the way that fatty foods clog human arteries. As it cools, it solidifies and clings to the inside of the pipes and can cause a **complete blockage** in the sewer line.

FIGHTING FOG CLOGS

Residential pipes clog easier since they are only 2" to 4" in diameter and can cost hundreds of dollars in repair bills because of sewer backups.

Think pouring hot water and detergent down the drain after the grease is okay? **Think again.** This only breaks the grease up temporarily. **Dispose of grease** in a **designated container** and place it in the trash.

THE FUNDAMENTALS OF **FLUSHING**

Avoid clogged pipes and messy sewer backups by disposing of items in a trash receptacle - not your toilet!

DO NOT FLUSH

- **Coffee Grounds**
- **Dental Floss**
- **Diapers**
- **Disposable Cleaning Cloths**
- **Egg Shells**
- **Facial Tissues**
- **Fat, Oil, or Grease**
- **Feminine Products**
- **Medications**
- **Paper Towels or Napkins**
- **Toilet Bowl Scrub Pads**
- **Wipes (Baby, Disinfectant, Moist)**
