EASLEY COMBINED UTILITIES

HOW DOES ECU KEEP OUR RATES LOW?

EASLEY COMBINED UTILITIES

1

We own our power.
As a member of PMPA, ECU jointly owns a 25% share of Catawba Nuclear Station Unit 2 - ensuring access to reliable power.

2

ECU maxes out the available number of **grants and pursues the lowest interest rates** possible to fund wastewater projects.

3

Capacity fees guarantee that developers are responsible for **shouldering the growth** for new developments.

4

We continually **compare rates** to provide **competitive pricing** to our customers.
